## EDUCATION

---

B.Tech in Computer Science and Engineering(AI)  
Galgotia College of Engineering and Technology, Greater Noida

2024

## SKILLS

---

Languages : C/C++, HTML, CSS, JavaScript, SQL  
Tecnologies : React Js, MongoDB, Firebase  
Tools : Git, Github, Postman, VS Code

## PROJECTS

---

### 1. Food Drive:

ReactJS, JavaScript, HTML, CSS

[GitHub](#)

- A food-ordering app built using React.js provides a comprehensive solution for ordering food online. With its user-friendly interface and powerful features, the app aims to simplify the food ordering process for users and enhance their overall experience.
- Designed and integrated a comprehensive cart functionality, allowing users to easily add, remove, and manage their selected food items before confirming their order.
- It helps users discover food that aligns with their choice of food category.

### 2. College Connect:

React Js, Firebase, CSS, HTML)

[GitHub](#)

- A Discussion Platform for students to solve doubts by connecting with similar students.
- Functionalities: Login/Logout, Register, Add Question, View Answers, Add Answers.
- The platform will have user profiles where students can customize their information, including their name, profile picture. This will help in building a sense of community and fostering connections between like-minded students.

### 3. Investor Connect:

ReactJS, NodeJS, HTML, CSS, and MongoDB

[GitHub](#)

- The platform aims to empower individuals with access to professional investors' stock bucket lists.
- The goal is to provide individuals, regardless of their financial knowledge or experience, with curated stock recommendations from experienced investors.
